

# 610BD Price printer scale

ACS-series electronic price printer scale. It uses advanced single-chip high-speed computing technology. The scale with highly converter, loadcell and display. Complete functions, stable and reliable performance. Equipped with a rechargeable battery, which can be used conveniently even when there is no AC power. The scale has the advantages of accurate measurement, sensitive, complete function, simple operation, convenient maintenance, etc. automatic dormancy and energy saving, small ticket printing, low voltage alarm, money change, etc. It can be widely used in commercial and other industries.

## Main technical parameters

1. Precision: 1/3000F.S
2. Power consumption: <1W, Energy saving state <0.1W
3. Overload: over 0.3% max weight will be automatic overload alarm.
4. Voltage: AC220V(-10%~+10%) 50Hz
5. Use environment: temperature 0~+40°C humidity <85%RH
6. [Amount] window show max amount "9999.99", [unit price] window show max "999.99".
7. Platter size: 35\*26cm
8. Implementation standards: GB/T7722-2005

## Main function

1. Tare, Zero, Amount, Delete, ticket printing and set. 26 unit price input and save, display light Adjustment, charge function.
2. Automatic sleep energy saving
3. Automatic energy saving
4. Function information tips, overload and undervoltage alarm

## Instructions

Place the scale on a stable and strong platform, Adjust horizontal position, open scale. waiting for the scale Self-checking ok. All window shows 0.00, Zero light.

## key operation

Tare: Press [Tare], weight window shows zero then tare light.

Zero: Weight is less than 3% of full scale, Press [Zero], weight shows zero then zero light.
